TITLE: IMPROVEMENTS IN TEMPORARY FENCES OR
HOARDINGS

ABSTRACT

A temporary fence (100) has a plurality of fence sections (10)
5 fitted with fencing panels (40), rotationally moulded from plastics material, to
infill the space defined by the stiles (12) and rails (14, 15) of the fence
sections (10). Vertical recesses (42, 43) releasably engage the adjacent
stiles (12) of the fence sections (10); and vertical reinforcing ribs (44) are
formed integrally in the substantially planar panel body (41). Releasable
10 fasteners can secure the fencing panel (40) to the stiles (12), rails (14,15)
and/or wire mesh (16) of the fence sections (10).
